

## TRADEMARKS, PATENTS, DESIGNS: you can get their value estimate online within 3 days!

**Finantis Value** is the first consulting company in the intangible assets valuation field to offer an online value estimate of IP rights (Patents, Trademarks, Designs) with the webservice IP'Nuts ([ip-nuts.com](http://ip-nuts.com)). It is fast, professional and customized.

IP'Nuts is a webservice based on Finantis Value's expertise and experience.

The value estimates are based on the user's information, collected online through dedicated evaluation forms, understandable by non-specialists. This ensures a quick, targeted and customized financial valuation.

IP'Nuts uses a methodology that complies with the standards and practices in force and focuses on the legal and operating risks and strengths of the evaluated IP rights.

The process is fast, secure and confidential. The client submits his data and IP'Nuts experts process them within 3 working days. A report is then edited, revealing the asset's value estimate.

The price is attractive, 990 € excl tax per evaluation.

The resulting report provides an indication of the value, but cannot be considered as an independent expertise.

This service is suitable for non-complex valuations.
